COMMENTS:

The "... example route" was created by converting the loop route into a route that:

- begins at the "Sample ride begin" waypoint (located at Longhorn HD),
- ends at the "Sample ride end" waypoint (located the intersection of New York Ave. & I-20),
- includes the roads in the loop route,
- includes waypoints for the loop POIs, and
- does not include waypoints for breaks, refueling, or food.

Before using this file, you should edit it to:

- replace the begin and end waypoints with waypoints of interest to you (like your home),
- insert waypoints wherever you want to stop on or near the route, and
- insert waypoints where you want to break, refuel, and eat.
